PROFESSIONAL SUMMARY

Data analytics professional with hands-on experience using SQL, Python, Power BI, Excel, Power Query, DAX, and statistical analysis to clean, transform, analyze, model, and visualize data for business and operational decision-making. Combines strong analytical capabilities with domain expertise in healthcare, manufacturing, supply chain, operations, and process improvement. Experienced in developing dashboards and KPIs, performing exploratory and statistical analysis, building decision-support tools, and translating complex data into actionable recommendations for technical and nontechnical stakeholders.

TECHNICAL SKILLS

Data Analytics & BI: SQL, Python, Power BI, Excel, Tableau, Power Query, DAX

Data Preparation & Modeling: Data Cleaning, Data Transformation, Data Validation, EDA, Data Quality, Relational Data Modeling

Databases & Programming: SQL Server, MySQL, Pandas, NumPy, Scikit-learn

Analytics & Statistics: Descriptive Statistics, Regression, Hypothesis Testing, ANOVA, SPC, DOE

Reporting & Decision Support: KPI Development, Dashboard Development, Data Visualization, Root-Cause Analysis, Process Improvement

Domain Analytics: Healthcare, Manufacturing, Supply Chain, Operations, Quality & Reliability | Additional: Machine Learning, Optimization, Minitab, R

SELECTED ANALYTICS PROJECTS

Retail Bookstore Analytics Pipeline | Python, SQL Server, Power BI

- Built an end-to-end analytics pipeline integrating web-sourced data, Python-based cleaning and preparation, SQL Server database modeling and querying, Power BI visualization, and statistical analysis.
- Designed staging, dimension, and fact structures; applied SQL JOIN, MERGE, GROUP BY, and analytical views; and developed interactive Power BI KPIs and regression-based analysis of pricing and performance drivers.

NYC 311 Service Operations Analytics | Power BI, Power Query, DAX

- Built a reproducible Power Query data-preparation pipeline covering data-type validation, text and ZIP-code standardization, geographic validation, response-time calculations, rolling-date filtering, and duplicate handling.
- Developed a Power BI analytical model and three-page operations dashboard tracking service volume, backlog, on-time performance, median and P90 resolution time, temporal patterns, and geographic hotspots.

Industrial Digital Twin & Fault Analytics | Python, Streamlit, Plotly | 2026

- Developed a modular two-tank digital-twin prototype modeling process dynamics and pump, motor, bearing, heater, and virtual-sensor behavior, with configurable normal and fault operating scenarios.
- Built an interactive Streamlit application with live Plotly trends, equipment-status monitoring, parameter and fault controls, synchronized CSV logging, and reusable JSON configurations for condition-monitoring and future predictive-maintenance applications.

House Flip Rehab & Investment Analyzer | Excel, Cost Analytics, Financial Modeling | 2026

- Developed a 12-sheet Excel decision-support model integrating renovation scope, a 158-item rehab cost library, contractor bid comparison, project economics, cost analytics, and executive dashboards.
- Built formula-driven KPIs for rehab cost, category and priority analysis, projected and actual profit, ROI, maximum allowable offer, schedule and budget variance, contingency utilization, and profit-per-day analysis.

PROFESSIONAL EXPERIENCE

Professor, Industrial Engineering | Former Acting Chair | Al Hussein Technical University (HTU) | Amman, Jordan | 2023-Present

- Apply Python, SQL, Power BI, statistical analysis, machine learning, and optimization to applied projects addressing operational and engineering decision problems across healthcare, manufacturing, supply chain, quality, and reliability.
- Develop data-driven applications involving data preparation, exploratory analysis, visualization, predictive modeling, KPI analysis, and decision-support tools for industrial and business use cases.
- Conduct applied analytics in predictive maintenance, healthcare operations, manufacturing performance, process optimization, and industrial AI, translating quantitative results into practical recommendations.

Academic Industrial Engineering Roles | Youngstown State University, German Jordanian University & Applied Science Private University | USA & Jordan | 2011-2022

- Applied statistics, operations research, quality engineering, reliability, production, and supply-chain analytics to industrial and operational problems.
- Developed and supported analytical work involving statistical modeling, process analysis, optimization, simulation, and data-driven decision support.

Data Analyst / Consultant | HealthCare Operations & Performance Excellence (HOPE) | Ypsilanti, Michigan, USA | 2009-2013

- Analyzed healthcare operational data and KPIs to support performance-improvement initiatives involving operating-room efficiency, radiology scheduling, IRB review processes, and infection-prevention compliance.
- Applied statistical process control, Six Sigma methods, process mapping, workflow analysis, and root-cause analysis to identify performance issues and support data-driven recommendations.

Supply Chain Manager | Tasty Sub and Beef | Chicago, Illinois, USA | 1998-2009

- Managed procurement, inventory, logistics, vendor coordination, cost control, and day-to-day supply-chain operations; analyzed purchasing, inventory, demand, and operating requirements to support sourcing and replenishment decisions.

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Certified Analytics Professional (CAP) - INFORMS | Certified Supply Chain Professional (CSCP) - APICS/ASCM | Project Management Professional (PMP) - PMI

Additional Training: Managing Big Data with MySQL - Duke/Coursera | Introduction to Generative AI for Data Analysis - Microsoft/Coursera

EDUCATION

Ph.D., Systems Engineering - Ohio University, Ohio, USA | **M.S., Management Information Systems** - Keller Graduate School of Management, DeVry University | **B.S., Computer Information Systems** - DeVry University | **B.S., Industrial Engineering** - University of Jordan, Amman, Jordan
